

Introducing **EndoCDx** a new in-office procedure that will lower your biopsy threshold.

EndoCDx tells you what you need to
know **earlier.**

Endo**CDx**[®]

EARLIER[™]

ORAL • LARYNGEAL • ESOPHAGEAL

Lower your threshold for biopsy to detect disease earlier.

ORAL

LARYNGEAL

ESOPHAGEAL

EndoCDx less invasive biopsy allows for earlier detection of precancer and cancer.

- **EndoCDx** in-office biopsy is a minimally invasive procedure performed to evaluate routine oral, laryngeal and esophageal lesions at an earlier, less suspicious stage.
- **EndoCDx Brush Biopsy** obtains a complete transepithelial tissue sample - penetrating the basement membrane.
- **EndoCDx** tissue samples are analyzed at CDx Laboratories by specially-trained pathologists, assisted by high speed neural network computers.
- **EndoCDx** earlier diagnosis for your patients can be easily adopted into your practice.
